

PERMANENT MAKEUP

Experience the convenience of wearing light makeup and looking great all the time.

Experience the benefits of permanent makeup!

- No need to apply and reapply makeup throughout the day.
- No faded look when your lipstick wears off.
- Great for active lifestyles.
- Beneficial for people with allergies to conventional makeup.
- Correct asymmetrical facial features.
- A solution to physical limitations that pose challenges to makeup application.
- Your morning routine is made easier!

Permanent makeup procedures involve a tiny microdot insertion of pigment into the dermal layers of skin on the lips, eyes and brows. Discomfort is managed with various topical anesthetic ointments.

Most treatments are completed within 1-2 hours with most patients returning to work on the same day, (depending on the patient), making permanent makeup a convenient process.

In addition to permanent makeup, we are excited to offer Cosmelan Depigmentation Treatment for skin damaged by sun exposure & facial blemishes.

MEET YOUR DOCTOR

Eye Surgical & Medical Associates is proud to welcome Cyndie Coverston, R.N. as our permanent makeup specialist. Cyndie has been a registered nurse since 1986, and a permanent makeup specialist since 1992.

Prior to moving to California in 2004, Cyndie was a nationally recognized training instructor in the field of permanent cosmetics, and a specialist at her own practice in Grand Rapids, Michigan.

Cyndie specializes in natural, daytime appearances.

You will love the convenience, look, and style of permanent makeup!
